Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Raso et al. [US 4,939,492] in view of MacLean [US 4,399,421].

Raso et al. disclose a trip system for a circuit breaker having a calibration system comprising:

- a bias spring [36] for establishing a trip force;
- a tripping member [20] responsive to a magnetic flux across an air gap [figure 1] for overcoming the trip force and generating a trip displacement; and
- means [54, column 3, lines 20-44] for adjusting the trip force.

Raso et al. disclose everything claimed except means for adjusting the air gap in the absence of adjustment to the trip force.

MacLean discloses an adjustable trip coil having means [72] for adjusting the airgap between a movable plunger [38] and fixed core [61] not adjusting the trip force.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use adjust the plunger/core airgap of Raso et al., as suggested by MacLean, independently of the trip force adjustment in order to provide adjustment to the fault level necessary for tripping.

Response to Arguments

Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1-4 and 9-11 are allowed.

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is 571-272-1988. The examiner can normally be reached on M-F 8-5.
